

Adrian Sizemore

Principal Network Engineer | CCIE #51766 Apex, NC | adriansizemore@gmail.com

PROFESSIONAL SUMMARY

Principal Network Engineer with over 25 years of experience leading global infrastructure strategy and architecture across large-scale, high-availability production environments. A technical leader who excels at evaluating and adopting emerging technologies to solve complex business challenges while influencing executive decision-making and driving cross-functional alignment. Proven track record designing resilient, scalable global backbones and modernizing legacy environments into next-generation architectures.

TECHNICAL SKILLS

Enterprise Architecture: Global WAN Design, Multi-Carrier Circuit Engineering, Spine-Leaf Fabrics (Arista/Cisco), Disaster Recovery Strategy.

Network Automation: Python, Django REST Framework, React, API Integration, Custom Tooling Development.

Security & Compliance: Network Segmentation, Global DDoS Mitigation, Secure Fabric Design.

Core Technologies: BGP, OSPF, MPLS, EVPN/VXLAN, Load Balancing.

Observability & Analysis: Packet capture (Wireshark or equivalent), Flow analysis (NetFlow or similar).

PROFESSIONAL EXPERIENCE

MetLife | Cary, NC Principal Network Engineer May 2022 – Present

- Influence and guide senior executive decision-making by aligning infrastructure strategy with business and financial objectives.
- Define and drive long-term infrastructure roadmap and modernization priorities across global production data center environments.
- Lead cross-functional collaboration across engineering, operations, and external providers to resolve complex infrastructure challenges.
- Drive resolution of technical and organizational conflicts across stakeholders, ensuring alignment on architecture decisions.
- Own technology selection and lifecycle strategy, including evaluation, vendor selection, and enterprise-wide adoption.
- Architect high-availability WAN solutions and manage multi-carrier MPLS lifecycle with strict SLA enforcement.
- Deliver large-scale, mission-critical infrastructure programs aligned with timelines, budgets, and operational goals.

MetLife | Cary, NC Lead Network Engineer October 2017 – May 2022

- Designed and deployed large-scale Cisco ACI fabrics
- Served as SME for complex BGP/MPLS backbone escalations and production-impacting incidents.
- Developed automation tooling to improve configuration consistency and reduce manual operational overhead.

Verizon Principal Backbone Engineer January 2016 – October 2017

- Led Tier 3 engineering for a nationwide carrier-grade MPLS backbone supporting high-scale, customer-facing infrastructure.
- Diagnosed complex BGP peering anomalies and executed large-scale traffic engineering operations.

Verizon Network Engineer (Tier 1 / Tier 2) 2005 – 2016

- Built foundational expertise in physical layer troubleshooting, circuit provisioning, and Cisco hardware lifecycle management.

EDUCATION & CERTIFICATIONS

East Carolina University B.S. Industrial Technology: Information Systems & Cybersecurity
(Currently Enrolled)

Wake Technical Community College AAS Telecommunications & Network Engineering

Certifications: Cisco Certified Internetwork Expert (CCIE) #51766 (Active)
